Chicago, IL | +18723292399 | darrenchristopher2500@gmail.com | [LinkedIn](#) | [GitHub](#)

Summary

Software Engineer with a Master's in Computer Science and over 3 years of full-stack experience building scalable, enterprise-grade applications. Proficient in modern frontend frameworks (**React**, **Next.js**) and backend architectures (**C#**, **.NET concepts**, **Node.js**). A strong advocate for software quality and cross-team collaboration, with a proven track record of optimizing complex systems to improve overall reliability and performance.

EXPERIENCE

Illinois Institute of Technology

Oct 2023 - Aug 2025

Research Assistant - AI

Chicago, Illinois

- Developed modern, responsive user interfaces utilizing **Next.js/React** and Angular, focusing on seamless user experiences across devices.
- Implemented cloud-native deployment strategies using **Docker** and **GCP** (Google Cloud Platform) services to ensure application scalability and reliability.
- Processed and analyzed large datasets using **Python (BERT/CNN models)**, demonstrating the ability to handle data-intensive research tasks.
- Designed and optimized **MySQL** schemas to handle **geospatial** data and user reports, ensuring data integrity and fast query performance.
- Implemented serverless backend functions using **AWS Lambda** to handle real-time data processing, reducing infrastructure costs and improving scalability.
- Utilized **CI/CD pipelines** for automated testing and deployment, adhering to best practices for mobile application lifecycles.
- Followed **TDD (Test-Driven Development)** principles, creating automated test suites to ensure code quality and prevent regression.

Hoki Distribution Niaga

Jul 2022 - Jul 2023

Software Engineer

- Led technical initiatives to migrate legacy monolithic applications to modular architectures, significantly improving **system reliability** and maintainability.
- Optimized application performance by refining Angular components and refactoring legacy code, resulting in faster load times and smoother navigation.
- Participated in **daily scrum calls** with business partners and stakeholders to gather requirements and report on project status.
- Engineered scalable backend solutions for high-traffic distribution systems, **optimizing API response times** through code **refactoring** and database **indexing**.
- Implemented **automated testing pipelines** (Selenium/JUnit concepts) to reduce production bugs.
- Used automation tools and testing frameworks (**Selenium/JUnit** concepts) to validate software performance and debug system-level issues.
- Wrote code and developed software tools using **Agile methodologies**, actively participating in sprint planning, design, and build phases to produce high-quality deliverables.
- Utilized **Git** for daily source revision control and contributed to **Continuous Integration and Continuous Deployment (CI/CD)** pipelines, minimizing deployment downtime.

SKILLS

- **Framework:** Laravel, Angular, Ionic, Flask, Next.js, Spring Boot, Spring, Hibernate, React
- **Database:** MySQL, PostgreSQL, NoSQL
- **Language:** PHP, TypeScript, JavaScript, Java, C#, Python, Ruby, Perl
- **DevOps:** GCP, Docker, AWS, Github Actions, Apache, Linux/UNIX
- **Communication Protocols:** HTTP, grpc, kafka
- **Automated Testing:** Selenium, Junit, PHPUnit, Jmeter
- **AI:** BERT, visionTransformer, Bitnet, Mobilenet, LLM

EDUCATION

Illinois Institute of Technology

Aug 2023 - Aug 2025

M.A.S., Computer Science

Xi an Jiao Tong Liverpool University

2017 - Jul 2022

B.S., Information Management Information System

University of Liverpool

2017 - Jul 2022

B.S., Information Management Information System

SCHOLARSHIPS AND AWARDS

- Xi'an Jiao Tong Liverpool University entry scholarship:2017-2018
- Cambridge Education Group scholarship:2023-2024

Projects

Robotics & Embedded Systems Implementation Jan 2026 - Present

Afila labs Chicago

- Configured and integrated **LiDAR sensors** on a **Jetson Nano Orin** platform, working directly with device drivers and hardware layers.
- Currently researching and developing a robotic solution for sewer pipeline inspection, applying engineering concepts to real-world infrastructure challenges.
